For if by the transgression of the one the many died, how much more did the grace of God and the gracious gift of the one man Jesus Christ overflow for the many.

Romans 5:15

Happy
FATHER'S DAY

Veritatis Splendor, St. John Paul II

Furthermore, such investigation is well-suited to meeting the demands of dialogue and cooperation with non-Catholics and non-believers, especially in pluralistic societies.

But as part of the effort to work out such a rational morality (for this reason it is sometimes called an "autonomous morality") there exist false solutions, linked in particular to an inadequate understanding of the object of moral action. Some authors do not take into sufficient consideration the fact that the will is involved in the concrete choices which it makes: these choices are a condition of its moral goodness and its being ordered to the ultimate end of the person. Others are inspired by a notion of freedom which prescind from the actual conditions of its exercise, from its objective reference to the truth about the good, and from its determination through choices of concrete kinds of behaviour. According to these theories, free will would neither be morally subjected to specific obligations nor shaped by its choices, while nonetheless still remaining responsible for its own acts and for their consequences. This "teleologism", as a method for discovering the moral norm, can thus be called — according to terminology and approaches imported from different currents of thought — "consequentialism" or "proportionalism".
